

Infusion pump sensor

Performance

Force range(FS)	300 gram
Excitation	5Vdc
Sensitivity, $\pm 1\%$	10mV/gram
Zero offset(@25°C)	0.8V $\pm 5\%$ FS
Repeatability	1% FS
Nonlinearity(BFSL).....	$\pm 1\%$ FS
Hysteresis	$\pm 0.5\%$ FS

Environmental

Storage temperature	-40 to 85°C
Operate temperature	0 to 50°C
Operate humidity	0 to 95%RH
Temperature zero shift.....	$\pm 3\%$ FS/10°C
Temperature sensitivity shift.....	$\pm 2\%$ /10°C
Safe overload	1000 gram
Insulation resistance(@250Vdc)	>50MΩ

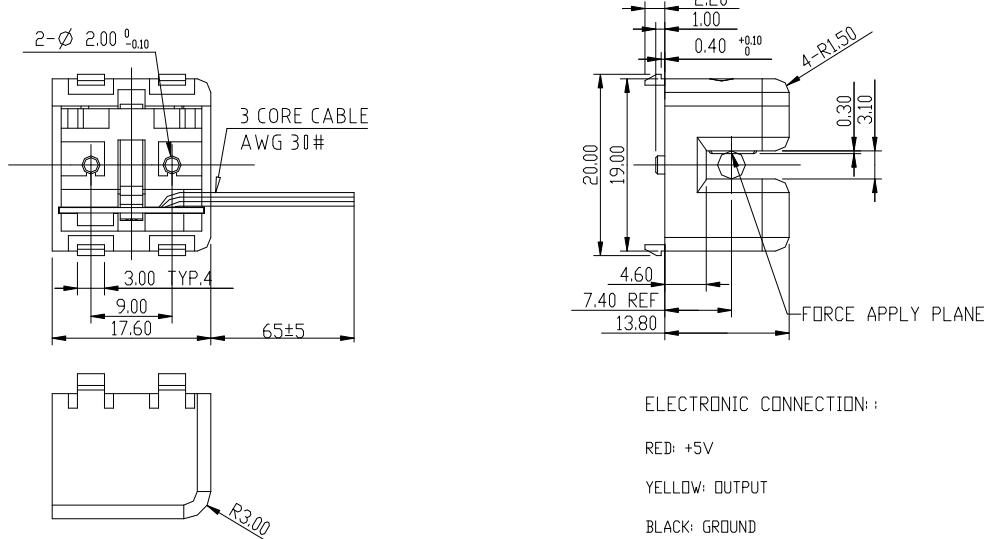

Features

- Compact size
- Non cut-in application
- Integrated amplifier
- Different tube applicable
- Different range available
- Bubble detect by option
- Unique force to pressure convert technology

Application

- Infusion pump pressure
- Medical device
- Physical therapy devices
- Hand tool forces
- Exercise equipment
- Process control equipment

Ordering Information

F1101E-300G

Force range: 300 gram
Signal output: 0.5~4.5V
